PROFILE

Full-stack engineer (3+ yrs) Building scalable web mobile apps with Next.js, React Native, Node/FastAPI, and GraphQL (Strawberry). Strong focus on frontend engineering including reusable component architecture, responsive and accessible UI, performance optimization (code-splitting, memoization, lazy loading), and modern state management. Experienced in testing, pre-commit automation, type-safe APIs, and data-fetching with TanStack Query. Shipped production features for startups and remote teams.

SKILLS

Languages: Python, JavaScript, TypeScript

Web Development Frameworks and Libraries: React Native, ReactJS, Next.js, Node.js, Nest.js, Express.js, FastAPI, Django, GraphQL, Fastify

State Management & Data Fetching: Redux Toolkit, TanStack Query, RTK Query Zustand

Databases: MongoDB, PostgreSQL, SQL

UI/UX Development & Design: Ant Design (Antd), Headless UI, Bootstrap, Material UI, Tailwind CSS, Three.js

Cloud & DevOps: AWS (EC2, S3), Firebase, Docker, Redis

Version Control & Development Tools: Git, GitHub, VS Studio, VS Code

Testing & Code Quality: Unit Testing (Pytest), ESLint, Prettier, Pre-commit Hooks

CI/CD & Automation: Pre-commit, Unit Testing, Continuous Integration/Deployment

Project Management & Methodology: Jira, Trello, Agile Methodology

Miscellaneous Tools: Strawberry (GraphQL), Strapi (Headless CMS), LLM Model Integration, HuggingFace, App Store & Google Play Store Deployment

WORK EXPERIENCE

HashPotato, Karachi Mar 2025 - Present

Software Engineer

- Developed and optimized full-stack web and mobile apps utilizing FastAPI.
- Cut API latency by 35% via refactors and modularization; integrated GraphQL with efficient client data fetching using TanStack Query.
- Instituted unit tests (Pytest) and pre-commit hooks (lint, format, tests), reducing regressions and speeding up code reviews.

LocalReviews, Ogden Oct 2024 - Mar 2025

Software Engineer

- Worked remotely on Next.js web applications, building scalable solutions with API integrations.
- Improved performance and user experience by optimizing core features in React and Next.js.

360Xpert Solutions, Karachi Jan 2024 - Oct 2024

Associate Software Engineer

- Built and maintained full-stack web and mobile applications using React Native and Next.js.
- Led API development and collaborated with designers and backend teams to deliver production features.
- Integrated backend services to deliver cohesive, end-to-end application workflows.

HH Tech, Karachi June 2022 - Jan 2024

Frontend Developer

- Developed responsive and interactive React.js web applications.
- Collaborated on UI/UX design in Figma to deliver accessible and user-friendly interfaces.
- Api integration via Redux and refactoring the code and modularization

EDUCATION

BSCS, UBIT

Feb 2021 - Feb 2025

B.S. in Computer Science

Karachi

Relevant Coursework: Object Oriented Programming, Databases, Discrete Mathematics, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advanced Data Structures and Algorithms, Human Computer Interaction, Network Security and Cryptography

PROJECT WORK

- **LocalReviews (2024):** Developed the complete frontend using Next.js and Redux, including API integrations and system-wide UI workflows.
- **Marathon Application & Ecommerce (2024):** Built a React Native application enabling event registration, tracking, real-time updates, and ecommerce features for iOS and Android.
- **Three.js Modelling (2024):** Rendered interactive 3D product models using Three.js with GLTF/OBJ assets from Blender, enabling real-time rotation, zoom, and inspection.
- **RESAL (2025):** Built a loyalty card system using FastAPI and GraphQL with reward optimization using Particle Swarm Optimization (PSO) and real-time data queries.

COURSES AND CERTIFICATES

- MERN Stack Development, Jawan Pakistan
- JavaScript, Saylani IT Training
- React.js, freeCodeCamp
- Blockchain Specialist, PIAIC (Presidential Initiative for Artificial Intelligence & Computing)
